

A Single Solution for Information Capture

Kofax is focused on the first and most vital step in information management: consistently capturing the various types of data that exist throughout your organization, in the highest quality possible, and indexing it all so you can easily find it again. Whether your information is on paper or in electronic files, whether it is parked at a central office or scattered on desktops and remote offices throughout the world, Kofax can help you capture it all quickly and accurately.

Ascent Capture accelerates business processes by collecting paper documents, forms and e-documents, transforming them into accurate, retrievable information, and delivering it all into your business applications and databases. It offers unmatched compatibility with scanners and other capture devices, plus content and document management systems, workflow applications and databases. No matter what hardware or enterprise applications you choose now or in the future, you can count on Ascent Capture to ensure consistent capture, indexing and validation of your important information.

Capture Documents, Data, and More

Ascent Capture delivers powerful, production-level document and data capture. For document capture, it boasts the fastest, most flexible scanning and indexing solution around. For data capture, Ascent Capture extracts important information such as machine-printed text, bar codes, hand-printed words and even checked boxes.

What's more, Ascent Capture uses the same powerful indexing and validation process to capture information that doesn't start on paper, such as electronic documents, multimedia files, email and even XML feeds from other systems. That means your workflow or content management system receives consistently indexed content – no matter what the source – and your enterprise benefits from reliable, easy and fast retrieval of all your information.

“Ascent Capture provided powerful information capture capabilities that no other product offered. We now have more flexibility and all users can access their documents directly from their desktop.”

— Lisa Whitbeck,
Children's Hospital
of The King's Daughters

Easy to Use, Easy to Install

Ascent Capture is recognized for its ease of use and fast, simple installation. Many applications can be up and running in hours, rather than days or weeks of installation and configuration.

Designed for Any Industry

We've sold over 70,000 Ascent Capture licenses into industries as diverse as local and regional government, financial services, manufacturing, transportation, insurance, healthcare, accounting, and legal. No matter what industry you're in, Ascent Capture addresses your needs.

Scalable for Growth

Ascent Capture is the cornerstone of the Ascent product family – it's a modular application that can be used right out of the box to meet the information capture needs of a specific department, and expanded to meet the complex requirements of a high-volume, mission-critical enterprise. From hundreds to millions of documents per day, Ascent Capture can capture it all.

Customizable to Meet Your Needs

Tailor Ascent to support your precise business processes with dozens of plug-and-play modules. From automated document separation, to postal mail scanning, to automatic classification of unstructured documents, to powerful forms-processing tools that extract information from even the most difficult documents, Ascent modules give you powerful, off-the-shelf alternatives. Or you can write your own. Ascent's flexible, open architecture makes it possible and comes with example module code to get you started.

Integrates with Workflow and Content Management Applications

Ascent Capture uses standard release scripts to connect seamlessly to business systems from FileNet, Hummingbird, Hyland, IBM, Interwoven, Microsoft, Open Text, Documentum, and many others. Ascent Capture can also export to any ODBC-compatible database or to a delimited ASCII file. This flexibility makes Ascent Capture the perfect front end for any system.

Ascent Capture Enterprise

Ascent Capture is available in an enterprise edition that offers network load balancing and high availability for mission-critical applications where an absolute minimum of downtime is tolerated. Ascent Capture Enterprise easily extends information capture throughout your enterprise by taking advantage of Terminal Services and Citrix server technology, and enables the processing of more documents in less time via multiple-instance support.
